

Our handy flute cutters are something you absolutely need if you work with corrugated plastic. Easily cut or score along the flutes or size prints. Our cutters have an easy to hold handle that makes it easier for cutting full sheets. Every shop needs at least one!

CORO-CLAW™ DELUXE

An improved version of our original cutter, comes in yellow and works on 4, 5 & 6 mil corrugated plastic. Has replaceable cutting heads.

CORO-CLAW III™

This bright green version of the cutter is for 3 mil corrugated plastic.

CORO-CLAW X™

Our newest version in black, is made for 10 mil corrugated plastic. The cutting heads are easily replaceable.

The BidDi Safety Sizer

BidDi Safety Knife

Bidirectional safety knife that safely, easily & precisely cuts your vinyls, film, laminate, paper & banner material. The BidDi Safety Knife, cuts both forward and backwards, typically for cutting sheets off of a printer, vinyl wrapping or making long cuts in banner material. The forward blade is used for making accurate cuts, in a straight or curved line. The back blade is used for fast long cuts. Will not cut into printer, laminator or table tops.

The Guardian Knife Guide

Cut, score cut, angle cut, plunge cut & make repetitive cuts. The first hand held knife guide, not a blade guide! Available in 36", 54", 66" & 102" lengths.

- **Cuts Easier**
- **Cuts Faster**
- **Cuts Safer**

See video on our website!

Knife bracket flairs for quick & easy mounting on extrusion. Cuts @ edge of extrusion for easy alignment.

Lip in extrusion keeps the holding hand away from the knife bracket. Knife can't jump or cut user.

Black anodized with a laser etched ruled edge for easy measuring.
