

# SAWTRAX Sign Maker's Panel Saws

Sign shops cut a variety of materials, so we created our Sign Maker's Panel Saws to fit your specialized needs. You no longer need to buy a panel saw and a mat cutter: you can have both in one machine.

## Advantages

### Accu-Glide Sealed Bearing System

- Added precision with easier, smoother pull

### Accu-Square® Alignment System

- Patented indexed alignment system, Always square

### Knife Cutter

- Does not require backer board
- Our knife cross cuts and **RIP cuts**
- Knife blade retracts for safe removal of insert

### 15 amp. Makita saw

- Saw Blade is guarded when saw is off machine
- Uses low cost 7¼" saw blades, found everywhere
- Blade/arbor lock for easy saw blade changes
- Able to score material by changing the depth of cut of saw blade
- Able to bevel cut material up to 45 degrees
- Rip cut in either direction
- Can use Freedom saw, Floating router insert, knife insert or Dibond cutter in the same carriage
- 2 Carriage locks to ensure no play when ripping or routing

### Premium Dust Collection

- Dust hood, 2.5" x 12' hose & a blade shroud brush

### Folding Stand/Wheels

- Our folding stand folds from the front like a ladder
- Our folding stand only needs one person to fold not two people
- Our folding stand has no holes to align or pins to drop or lose
- Our stand is more than a couple pieces of angle iron "U" bolted to a frame
- Our frame wheels are larger 5" wheels for easy movement and are **not** supporting the machine while it is in use, so our panel saw won't roll away on you
- Folding stand & wheels are attached at the factory

### More Material Support Rollers than other machines

- Material rollers can be raised so cuts can be started from the bottom

### Spring Hold Down for holding thin sheets in place

### Stop, Extension Bar and 2 Measuring Tapes

### Dual Rip Gauge with Measuring Tape

## Accessories

Mid Fence

ACM/DiBond Dust Free Cutter

New Scoring Knife

**\*\*See video on website\*\***

C52SM

Perfect for space restricted shops or to take to the jobsite. You will have all the capabilities of a larger panel saw packed into a smaller, space efficient frame. This machine is expandable in both width and height, which means that this saw can change with your needs.

\*Compact 64 available

\*Shown with optional full mid fence

FS64SM

Have a little more space? These fullsize machines will handle a large sheet with no problem. The 10' fully welded frame and 18 material support rollers provide full sheet support. Saw turns for unlimited ripcut.

## New Optional Accessories:

ACM04

Cut your .040 aluminum, 2, 3 & 4 mil DiBond & other materials! Zero dust & rolled edges on your panel saw! Virtually no noodling or drop!

Scoring Knife

Easy, dust free way to cut Sintra and other materials that require several passes with a knife.
