...we didn't reinvent the wheel - just the dolly.

Rack & Roll 8 Post Safety Dolly

Available Models:
Rack & Roll Safety Dolly
SKU# BSD MSRP: \$499.00

Options:
2 Additional 56" Posts
SKU# DMP
MSRP: \$39.95

The small foot print and huge carrying capacity of the Rack and Roll Safety Dolly is designed as a substrate carrier in the sign industry and a mattress dolly in the hospitality industry. By sectioning off the 25" by 30" base with the 8 posts, multiple types of sheet and or rolled substrates can be carried at once in the sign industry. It allows the user to load a printer or cutter from one section and load the finished product onto a different section eliminating the need for two carts or double handling the material.

Our Rack & Roll Safety Dolly features 3" locking stem and wheel casters. These casters are mounted to the corners of the dolly giving it more ground clearance than the yel-Low Safety Dolly which allows the Rack & Roll Safety Dolly to go outside on uneven surfaces.

Includes 14 vertical post positions and 8 horizontal post positions.

In the hospitality industry, it allows one user to load or flip mattresses with ease. It turns a 4 man job of carrying two mattresses into a one man job. It can carry rugs, furniture, boxes, luggage and AC units with ease.

The all steel US made uni-body box has the sides formed down and then in at the bottom with 8 welds forming a solid base to carry up to 1000 lbs. The four stem and wheel locking 3 inch caster provide a lower loading height than the raised yel-Low Safety Dolly providing the advantage of a lower stationary loading and unloading of the platform. This is very helpful when loading sheets on and off of a flat surface like a flat bed printer or a mattress off of a bed.
