

CORRUGATED PLASTIC CUTTERS

- Hand-held flute cutter for corrugated PVC such as Coroplast®
- Available models for 4 mil, and 10 mil corrugated PVC
- Score with outer prong and cut with inner prong
- Replaceable blades

CCD4 4mil Coro Claw

CCX 10mil Coro Claw

Patented ergonomic handle houses dual-prong replaceable blades to easily and effortlessly cut along the flutes.

Insert inside cutting prong into flute. Using even pressure, pull so that the prong goes straight into flute and pull Coro Claw™ towards you, cutting the sheet as you go. Coro Claw™ cuts cleanly through the sheet travelling along the flute.

Quickly score sheets to create point of purchase displays, boxes, and join panels together when cutting with a single prong.

Insert outer cutting prong into flute. Using even pressure, pull so that the prong goes straight into flute and pull Coro Claw™ towards you, scoring the sheet as you go. Coro Claw™ cuts cleanly through the top layer of the corrugated sheet for easy bends. Cut two flutes side by side for seamless corners!

CUTTING A SHEET

SCORING A SHEET

BIDDI Safety Knife

- Safety knife for cutting banners, vinyl, laminate & more!
- Bi-directional blade cuts forward & backward.
- Ergonomic handle makes cutting a breeze!
- Replaceable blades.

BI-DIRECTIONAL

Unique cutting head cuts both in a forward motion and backward motion!

Blade is fully protected and will not cut into tabletop, printer or laminator.
