

Vertical Panel Saws

2000 SERIES

Hypoid Saw on a Spinning Insert
w/Dust Collection

Steel Sleeved Material Rollers

Sealed Steel Roller Bearings

Measuring System

Product Description:

The 2000 Series panel saws include a heavy duty Makita Hypoid saw. This 15 amp. saw has similar power to a worm drive saw without the need to constantly change the oil that lubricates the bearings. This machine is designed for production shops that are cutting 50 or more sheets a week or very hard material. Steel sleeves over the rollers act as armor to protect the plastic rollers from cracking. This series is ideal for customers that need to break down sheet goods up to 1¾ inch thick with precision cuts.

Standard features include the saw on a Spinning Saw Insert Plate, a robust dust collection system, an easy to open & close folding stand for complete stability while in use, and steel sleeves to prevent damage to the material rollers. This 10ft. frame provides an unlimited rip cut capability.

Available Fullsize Models:

52" Cross Cut Model# 2052

64" Cross Cut Model# 2064

76" Cross Cut Model# 2076

Standard Equipment:

Powder Coated Steel Frame
Nickel Chrome Plated Guide Tubes
Accu-Glide Sealed Bearing System
