

SHUTTLE DOLLY

This larger version of the yellow Low Safety Dolly has a wider base and increased carrying capabilities. Having a base of 29 in. x 36 in., the Shuttle Dolly is perfect for any warehouse and is customizable for your specific facility needs.

The Base model Shuttle dolly can be configured with 4 swiveling casters or with 2 fixed and 2 swiveling casters. The four 56 inch posts allow the user to stack and carry more items in the same amount of floor space.

The Fulfillment Shuttle dolly is ideal for warehouse operations. With the wheelbarrow handles, loads can be transported without touching the product. Instead of turning a loaded dolly around in a confined space.

Mattress Shuttle Dolly

The Mattress Shuttle dolly is ideal for mattress and TV transport. With the 5 inch omni directional casters and tall 62.5 inch posts, this dolly has greater clearance and won't drag product on the ground.

For greater ground clearance, casters can be placed on the corners of the dolly.

Base Shuttle Dolly

Customize your dolly for your needs:

4 inch caster fixed or turning
5 inch caster fixed or turning

Add a pair of 56 inch posts
-Upgrade to 62.5 inch posts
-Upgrade to 72 inch posts
