

# VERTICAL PANEL SAWS

*...the only dolly designed with the sign industry in mind.*

## 3000 SERIES

Our patented Accu-Square alignment system assures that your machine will never go out of square, and our Accu-Glide sealed roller bearing system provides for smoother carriage action and tighter tolerances.

10" Saw on a Spinning Insert w/Dust Collection

Sealed Steel Roller Bearings

Sealed Steel Material Bearings

Measuring System

### Product Description:

The 3000 Series panel saw would be recommended for door manufacturers or custom woodworking shops that want to take advantage of using a 10" saw blade.

### Available Fullsize Models:

50" Cross Cut Model # 3050  
62" Cross Cut Model # 3062  
74" Cross Cut Model #3074

The saw is designed for cutting thicker material, up to 2½", or making finer cuts on material like Melamine.

Steel sleeves are used to cover the material rollers, like a knight's armor, preventing damage to the rollers themselves. The dust collection system uses a dust brush that contains the sawdust, allowing the larger diameter dust hose to remove it.

The Folding Stand is as easy to open & close as a ladder, yet provides complete stability while in operation. For portability and mobility, Transport Wheels are included.

### Standard Equipment:

- Powder Coated Steel Frame
- Nickel Chrome Plated Guide Tubes
- Accu-Glide Sealed Bearing System
- Quick Release Carriage with 2 Locks
- Retraction Mechanism
- Cord Holder
- Center Material Support

### Package Includes:
