

Job Site Scoop Dolly

Perfect for transporting items on the job site

Improve Job Site Productivity

A job site version of our Scoop Dolly for all-terrain travel.

The Job Site Scoop Dolly is made of powder coated steel and aluminum angle construction. It uses a 68" pivoting support brace and a 4 position saddle post system to angle the product's center of gravity over the dolly, regardless of the product's height.

The Job Site Scoop Dolly uses up to seven flat-free 10" tires in operation. With four locking, flat-free, pivoting tires and three flat-free fixed tires, it has an expanded footprint that allows it to go over gravel, rocks and mud.

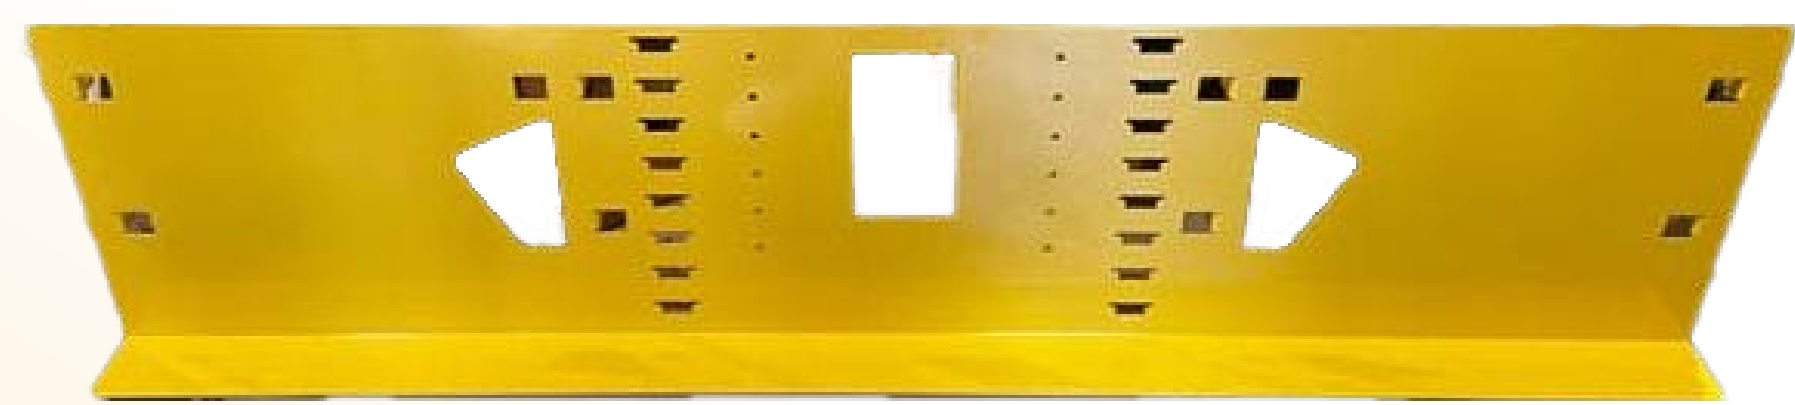

The vertical posts can be used with E-track straps to hold the product to the dolly.

Base model

Optional Accessories

Available for both manual and motorized Job Site Scoop Dollies

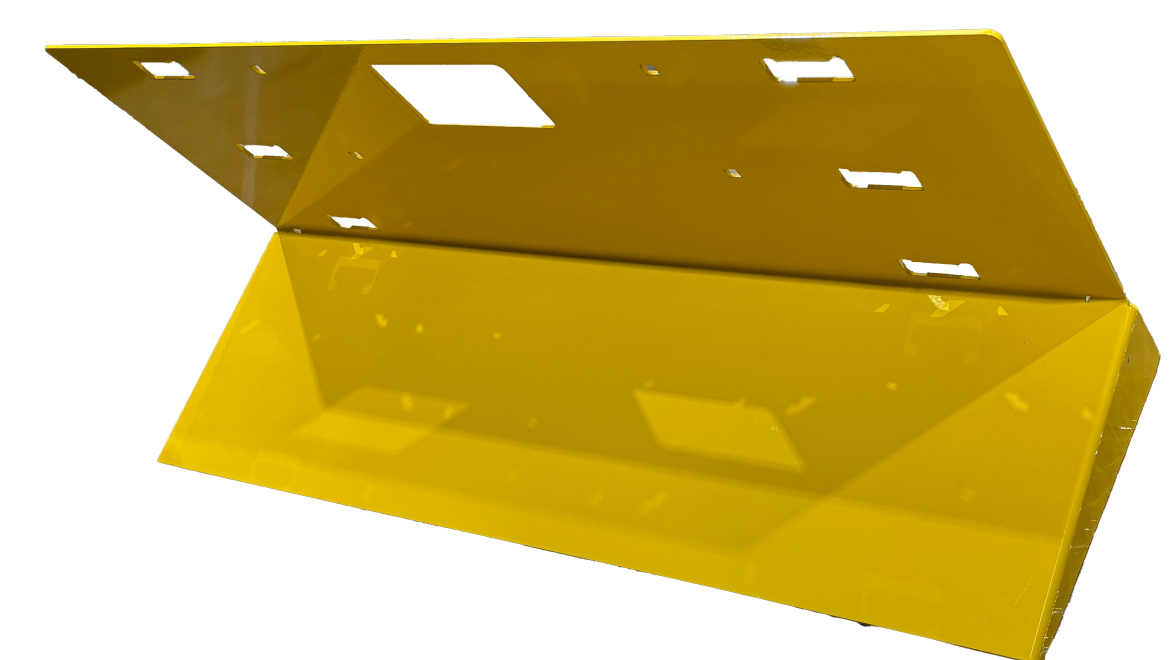

Adjustable Backer Plate

Allows you to mount and adjust the height of the Drywall Lips as needed.

Standard Drywall Lip

The Standard Drywall Lip is 9" deep and can hold up to 500 lbs.

Reinforced Drywall Lip

A reinforced version of the Standard Drywall Lip, which increases the weight capacity of the lip to 700 lbs.
