

Safely transport glass, drywall, sheets or slabs on any terrain

Compact and Tough Delivery Cart

Self-Adjusting and All-Terrain Panel, Glass, Sheet and Slab Cart.

The Panel Express can breeze over obstacles both inside and out. How does it work? The self-adjusting brace mechanism automatically adjusts to hold up to three inches of material. Simply set your substrate down onto the dolly and the rubber lined clamp automatically clamps down on the piece. Need to carry more sheets? Lock the brace open and load up to 3 inches of substrates in the clamp and stack your additional sheet goods on the optional shelf.
