

yel-Low Safety Dolly

...we didn't reinvent the wheel - just the dolly

Fast, Easy, Safe and Efficient

Move items safely using the yel-Low Safety Dolly.

What is the value of doubling, tripling or even quadrupling the productivity of your employees? Can you afford to pay 4 men to do a one man job? One man can remove 2 mattresses from a hotel room in 90 seconds with the yel-Low Safety Dolly.

Base model

The yel-Low Safety Dolly is a truly innovative and "indestructible dolly" for any industry. It can carry mattresses, large flat screen TV's, bulk items like kayaks or ping pong tables, headboards, desks, sofas, chairs and most items up to 1000 lbs.

With a powder coated steel unibody, the yel-Low Safety Dolly sits 1/4" lower than a 3-inch floor dolly and an inch lower than a 4-inch dolly. It's about the height of a pallet.

What makes this a truly innovative moving device is the post system that allows this dolly to be reconfigured for any job at hand.
