

Reach-Nest

Stable Docking Station for Organized, Ready-to-Use Reach Tools

The **Reach-Nest Tool Holder** keeps your reach pole exactly where elevated work happens. Whether crews are on rolling ladders, order pickers, or lift platforms, the Reach-Nest eliminates the unsafe juggling, leaning, and repeated climbs that slow down workflow and increase risk. Molded from glass-reinforced ABS, it mounts directly to ladder rails, picker platforms, carts, and rack uprights.

#PR
NEST

Workers climb ladders and platforms constantly, and once they're elevated, tool handling becomes a safety risk: overreaching, juggling tools, and making extra trips. **The Reach-Nest Tool Holder** removes those hazards by keeping the reach tool staged exactly at the work point.
